Plague inc parasite normal guide

Ashlyn has been playing video games for more than 20 years. His blogs have been viewed more than 7 million times. Learn how to defeat parasites in normal with the help of this guide! Beat the parasite in NormalWelcome to educate me on how to beat the plague parasite Inc.'s in normal. The parasite is similar to the virus. However, the parasite has an added feature called hembyosis. This allows symptoms to prevent the discovery of parasites. It helps us a lot. While the parasite is very simple in nature, I have redesigned this tutorial in order to build quick points. Let's get started! Quick overview first and foremost: we will be allowing symptoms. Also, syring is found under abilities. Step by step instructions to start your parasite in South Africa, or another hot country of your choice. Build DNA points to 30. Get water transfer 1. Get water transfer 2. Build DNA points to 30. Get air transmission 1. Get air transmission 2. Build DNA points to 100. Get drug resistance 1. Get cold resistance 1. Get cold resistance 2. Get heat resistance 1. Get heat resistance 2. take the symbrose 1 . take the symbrose 2 . Build DNA points to 50. Get drug resistance 2. Build your DNA points until everyone is infected. Work your remaining points to the symptoms. First, get to Total, the member of defeat. You can then spend any remaining spot wherever you see fit. Congratulations! You beat the parasite in normal.Another strategy for parasites in NormalMore Plague Inc. tutorialsScreenshot from the game. Sharing your feedback has been working very this tutorial for you and appreciating any and all the feedback you want to provide. Please tell me how you did it. Poll 5Anastasia on August 17, 2020:Almost not working: 98% treatment; 776 daysSally on June 10, 2020:It worked! Thanks so much! :D:(on May 14, 2020:It didn't work the first time but i will keep tryingBeans on March 26, 2020:1163 days on brutal! Andrew W on March 23, 2020:The original tutorial is spot on. All I did differently was add neural atrophy. It delayed treatment at a steady paceAndrew W. on March 23, 2020: Resurrection Killer, took in 68% at 588 days. Good run.idk on March 19, 2020:worked super ez cure 51% 913 daysah? on March 06, 2020:Don't work; I was discovered 3 times in a while even with no signs. What worked for me was just a few variations: Save 30, Get Water 1 and 2.Save 30, Syring 1 and 2.Save 30, Get Air 1 and 2.Save ~80 get the rest as described, except with painstaking drug resistance 2 since at this point you won't need it. Save until everyone is infected and then go for total organ failure as described. Do what you want with extra points. That I finished in 933 days with treatment at 35%.sexualchoco on February 24, 2020:I used the idea but I upgraded the symmconess 1, and the first 2 due in previous attempts I spotted it right away but got a lot of help so thank you :)G on February 17, 2020:It's looking for a guide but I was buying symsthe 1 and 2 when I was enough Then let's dna dna Up again to get drug res 1, cold and heat res 1&2 for both. While waiting for everyone to get treatment for my infected gameplay was going very fast so when it came to about 50% I invested in genetic reshuffle1 and 2 that it took enough time to infect everyone, then all points to the symptoms to the member broke down as more points came I just kept adding to the symptoms. 922 days and 56% treatment at the end.Michael on February 10, 2020:Almost didn't work, the treatment got to 94% but I started taking stacks of puffs and buying 3 genetic reshuffles. thxAwais on February 04, 2020:Worked perfectly. You just have to be patient while it infects the whole world and save at least 70 points to get the symptoms needed. Gabrielle worked perfectly with 953 days on December 31, 2019, and 74% of treatment people say the treatment was published early, that's true. Also, some people still make mistakes doing the whole job of organ failure, but the world is not yet completely infected. You have to wait for it to completely over the world, and do the whole member breakdown job. Also, what I did to defeat the game, I was insufficiency in the whole thing, I realized that I didn't have enough DNA points to buy total organ failure, so I involved everyone, and I bought and won the game again! Come on, listen to the instructions, don't rush it. Chrisie on December 12, 2019:Worked perfect, 722 days, 48% cureGamerHacker on November 02, 2019:Did not work, cure was releasedE on October 27, 2019:Did't work killed half of humanityEmpty*liz on September 23, 2019:Thx brother, it workedCrap game on September 17, 2019:Followed to the letter, did not work. ThanksHi on May 23, 2019:I Recommend to symosis for the first time because they can still find out about the disease. Not :) May 19, 2019: The last country I contracted was Sweden. Licky meName on April 02, 2019:I Personally Symbiosis 1.Get Symbiosis 2.Maybe even 3 before having any resistance but then I don't save until I can buy them allNickname on March 29, 2019:I tried twice but the first time they didn't die fast enough after being infected and the second time the infection didn't spread fast enough408 on February 17 , 2019:It was very easy to look for no problems at all! Performed in 667 days with only 30% complete treatment. 19,640 points! Much!! Demig0d on February 15, 2019: Once again his training has outs taken my expectations I was able to beat brutally with this 943-day statistic 59% treatment and a score of 13740Someone on January 20, 2019:It worked. until the end. I broke enough to reach total member, the treatment was too fast. Will a way for more DNA stop? Huwar on December 27, 2018:1023 day 79% treatment I had to DNA looking for things to throw treatment to about 60-65% (%) Otherwise the treatment would have won! :D Thanks for carrying me through the whole game! theres not much left of me right now . As said above thanks. It should take very hard, VV as said below thanks too for your efforts to put webpage/walkthrough. It really helps. Pradhuman on November 21, 2018:Thanks for your efforts11fastgamer on August 22, 2018:worked for me, but got halfway spotted. so i did genetic reshuffle 1 and i killed evryoneVeronica on July 09, 2018:I changed it a little bit. I won the game by parsing any jumps until everyone got infected. Instead of using points in transition, I evolved all three hems first. early in the game. As long as you make sure every last human is infected before any symptoms have evolved, you should be fine. Aim for total organ failure and coma. oh , and make sure you use drug resistance and genetic hardening . john on April 27 , 2018: i just want to say . It is also very effective in brutal as well. Both times helped me keep working well Natasha on February 11, 2018:Thank you again! Follow. 51% treated. In Saudi Arabia, only change has begun. On November 29, 2017: He did everything he said and went well. Thanatos on December 22, 2017:Is it now 2 times without result. The disease was really caught soon and the treatment was really advanced at a certain point. I just need to kill 1B and 23B in both attempts, but hey, he's still trying as hard as needed. the hardest ever. Mitchel on December 07, 2017:Placed Symbiosis before transmission this is better to stay in stealth. On August 14, 2017, Arias: I don't like when you kill over 7b and don't win. Someone on August 11, 2017:Symcythia needs to be placed more or less first, I always go mid-way through the part where I need to save up to 100Parasite points on August 03, 2017:719 day 68% treatment, symcythia does nothing, I upgraded it to the maximum early and was still easily diagnosed. On June 28, 2017: Symosis should be more a top priority. With this walkthrough, it notices and the treatment started too quickly. They are the right treatment about when you are able to progress to a few complete organ failures. Level 3 symosis early on, even before climate resistance made a massive difference. Before they realized the disease I was killing them well, Greg on July 19, 2017: Until you just keep decomposing all the symptoms until everyone is infected, you can win. Once all infected, put points to the marks and watch the world die. Alex on July 07, 2017:756 days and 66% cureAndrewGaming on June 12, 2017:Mostly, you must have to develop the Drug Resis, Genetic Reshuffle, and more to keep the scientist working. You can also develop paranoia into countries with cureAngus not working on June 12, 2017:Thanks, this work wellorteam on May 28, 2017:work :)Analy on May 19, 2017:794 day 48% treatment! Another tutorial that woks but I change some things in the end. I have transitioned and heat and cold resistance as well as evolved drug resistance many times otherwise treating them meKyoki on May 18, 2017:Started in India and it was much better on May 01, 2017:It didn't work I did it 5 times! I love you. And they are always left or treated ready Samantha on April 30, 2017:987 days. 62% treatment. Win! Ry on February 11, 2017:I tried to make it once their way by letting the symptoms go however they were happy and they started developing treatment by the time 20% of the world was infected and I failed by the time half the world was infected and then I run it again and de-evolved all the symptoms that went nuts and I beat itAnonymous on January 13, 2017:I got my name to face my damn! Anonymouse on January 02, 2017:Its all about making them crazy and think there's really nothing wrong while they are actually infected and dying quickly. Jen Anderson on January 02, 2017:It worked for me; 980 days and 70% treatment. I also recommend using DNA points for genetic hardening and reshuffles, as others have said. Thanks! I did not work on December 26, 2016. It should be used to promote sheep transfer and sterile transmission. Kaz on December 20, 2016: It doesn't work.... The only way it does is to add genetic hardening and a couple of GeneticMystery reffles on December 06, 2016:Sorry it doesn't work I try about 3 timesRozack on November 06, 2016:48% treatment 643 days total score:11940Jake on October 22, 2016:It doesn't work in multiplayer at all.A random person on October 12, 2016:Als going

down from pimples. There are relatively deadly upgrades. Jarrod Hawkins on 25 July 2016: I Recommend using your extra rating for genetic hardening and reshufflesAshleign (author) on July 11, 2016:Just update a video on this tutorial check them out on www.youtube.com/chillbillysauceY on July 10, 2016:99% treatment... Close contact, but it's made. Rob on 05 July 2016: Marry me? Death on June 15, 2016:51% treatment, 841 DaysMaxWasy on May 24, 2016:Well but took an Emma long time on March 27, 2016:Use this in brutality. 807 Paula day on March 12, 2016:it worked for me, but I reached 99% and then I finally reached enough DNA-points for a genetic reshuffle.Mr. It on March 08, 2016:Towards the end I had to make some adjustments to complete the level, but aside from that, this works. Justin Hunt on March 03, 2016:Worked well for its addition almost going to 95%Morriganna on February 29, 2016:If you coexist earlier on it's much more effective Papyrus on February 08, 2016:Worked! But I was looking esactly I worked into organ failure from coughing and worked42ndsheep on December 03, 2015:Not working, To repair: Before you go for total organ failure (I even go into it for a really long time and recommend going there from cough) your rating to 100, also rotates all the symptoms until you infected everyone in the world hetman on December 01, 2015:The first time I tried this, I was diagnosed with everything followed step by step and shit to early and I lost, with Greenland infected but mainly healthy. Immediately after that I decided to try my own method. Firstly, start in a warm country, so that all other hot countries become infected in due course. Please note that using this method you have to play fast forward, as you usually win at 900 Or more depending on how fast things evolve. Anyway, at first, if you have opened the gene for reward DNA when decomposing, then use it. This will make things easier later in the game. Wait until you like 50 DNA points, and then fully evolve the symatiation to level 3. This will ensure that your parasite will not be detected, and then get Air 1 & 2, Water 1 and if you have any points left and you can afford it, Drug Resistance 1. Then your parasite can mutate a few marks, but don't bother. Now wait until you get 50 or more DNA points so that you can resist drug 2 and genetic hardening 1. Now keep in mind that you should detect any symptoms of evolution as it will detect either people dying faster or their parasites getting faster. If it mutates, they rotate any deadly marks. Now storing your DNA points until you infect everyone in the world or the message of other healthy people remaining in the world comes up. Now your main goal is to achieve the entire first defeat member. This will ensure that people die quickly. After getting enough DNA points get necrosis and hemorrhagic shock. Now the mortality rate is going up, and you're going to have a steady income from DNA points. We have received all genetic Reshuffle (1,2 and 3). Now all you have to do is sit down and see the chaos! You beat the parasite in the ordinary! If this doesn't work please go back to me. Then I'll find another strategy, Mokona, on November 15th, 2015: Good training! I started in Africa and worked!! Thank you :)Foulli on October 19, 2015:It almost got to me, but without symuff 3 and a few more drug resistance while everyone was being killed by the TOF I was lost. However, it's a good walkthrough otherwise, just a few tweaks or quick thinking on the players part :3Thank youHigherlevel1 on October 07, 2015:They cure it before i can infect everyone think allowing early symptoms on is doing it going to try again can u updateTRex on August 23, 2015:Nice tutorial but unfortunately it didn't work for me. Greenland was the last and slowest to get infected and the treatment went incredibly fast. I'm going to try this but fully evolve the syming to see what happens. Thanks! Nagrom on July 10, 2015: I Don't like your training but I just didn't work for me so I tried it myself and I did well. All you really have to do is evolve all three of the hems, withstand water (to the maximum)air transmission (to the maximum)resistance to cold and heat all the way. Your symptoms are sick until everyone in the world, then evoked your symptoms until you reach total organ failure. thats how i won . But I still love you and your training, to be honest. On June 25, 2015: I'm a big fan of your work, but I've done it six times and it's not working. Please help. wat on June 19, 2015:That may be my fault for naming it Twerking ... As soon as it was discovered, the world was quite keen to eradicate it. I'm not learning, because my next attempt was Yolo. That was diagnosed on its own and was also destroyed by extreme prejudice. Let's see how Swag does it... wat on June 18, 2015:Spontaneously discovered during step 5, without any symptoms. It didn't go well. (: on May 31, 2015:i don't know what i dis wrong but i had no symptoms and people were treating my disease like it was really deadly lol but the cure was complete before everyone got infected);Flutter on May 30, 2015:This tutorial only works about 30% of the time. Scientists will find the disease almost immediately. Ray on April 13, 2015: Should I rotate transfers and abilities once everyone is infected? Lrxx on 10 April 2015: Darren only 15.000 people survived in Greenland. I got infected but ended up some surviving going to try again, thanks for your training though! Josh on April 05, 2015:Im trying to complete it, ive played several times with these strange instructions but they keep finding the parasite really early and treating it :P Liam on March 30, 2015:It works. But my computer forces will be shut down immediately but I will try again. I am forced to evolve the adilitic parasite because of its high intensity . Nice Tutorial.Braydeng71 on February 26, 2015:DNA sequence : StandardDifficulty: NormalTime: 1062 DaysCure progress: 69% completeScore: 4080Thanks for the tutorial! Did I do well?Cindy on January 22, 2015: Did you do it or do brutal and mega toututials? Ashleign (author) on January 20, 2015:Or Sir.. it doesn t matter . Zalel on January 19, 2015:Full! - Thank you. Ashleign (author) on January 16, 2015:I'm not sure. I check, I don't have it on my phone anymore.0897867564 on 15 January 2015: There is no symsthe in the mobile version. Ignore?wawawawifus on January 10, 2015:But I still wonwawawifus on January 10, 2015:Not enough DNA pointsLolcraft on January 05, 2015:You can actually go without drug resistance 2. It takes longer but you can kill much faster though.meggan on January 04, 2015:Leap? August 28, 2014: So I followed this up exactly, but the parasite was taken into consideration and the treatment beat me. Is this normal? Tristan on December 21, 2014:I'd say that you have very good training but I buy symmosis 1 and 2 in bwgging because I had a problem with it realizing when it had no symptoms and no way to get noticed JoMoFo on November 15, 2014:Great Job! And in just 798 days:D irishjay91 on November 13, 2014:Use your tutorial on mushrooms and it helped me a lot and using this tutorial on parasites has not yet been discovered and my first attempt thanks for your helpAshleign (author) on November 10, 2014:Welcome! 2014: Welcome!
